

OBJECTIVES

- *To facilitate networking among nurses, respiratory educators and other health professionals throughout New Zealand.*
- *To support and encourage one another through mutual sharing of ideas and resources.*
- *To update on new research and current management of respiratory conditions.*
- *To explore new ways of managing respiratory conditions to improve the care of affected people and their families.*

The Lung Environment

Please note—content and timetable may be subject to change.

How are you, your service, your team advancing respiratory health care? Tell us all about it!

The SIREF committee would like to offer nurses and health professionals the opportunity to showcase their work and to win a prize. Poster presentations are a common method of presenting data at forums. The main advantage of a poster presentation is that it allows the author to interact directly with interested members of the audience.

Abstracts are requested for poster presentations and should relate to aspects of respiratory care. These must be received by 3rd February and should include a brief summary of the project/study and ideally follow these guidelines:

Title, Author/s, Address/es, Text Methods, Results, Conclusion, References. One poster per applicant/team. Approximate size 700x900mm. For more information please email teresa@canbreathe.org.nz or phone 03 386 0278.

Please send registration form to Canbreathe, postal address on back of form.

Registration Details:

Name: _____

Position: _____

Address for correspondence to be sent to:

Phone (Daytime): _____

Email: _____

I will be entering the poster competition **Yes/No** (please circle which)
